

EXOTIC HARDWOOD / HIDDEN CLIP + STAINLESS SCREW

NO FACE FASTENERS. 305/316

THE HIDDEN SYSTEM FOR PREMIUM DECKING.

Exotic hardwood and dense tropical species need two things: a hidden fastener that holds without splitting, and a stainless screw that won't streak or corrode. HC clips with 305 SS coil deliver both: no face fasteners, no staining, no pre-drill on the clip.

- Hidden clip system: no exposed fasteners on the deck surface
- 305 or 316 stainless: resists tannin staining from ipe, cumaru, teak
- Hardened Type 17 tip: no pre-drill on dense tropical species
- HC clips apply at the board edge for blind fastening across the run
- Compatible with ipe, cumaru, teak, garapa, and similar hardwoods
- Coil on FDVL43 (150/roll) for stand-up hidden clip installation
- Strip option for smaller crews or detail work

305 SS COIL / FDVL43

CS8200SLP-T17 #8 x 2" 305 SS Type 17 1,800/box \$214.00

CS8212SLP-T17 #8 x 2-1/2" 305 SS Type 17 1,800/box \$223.00

HIDDEN CLIP (HC SERIES)

HC clips for ipe and dense tropical decking. Ask rep for current SKU and pricing by species and board thickness.

THE SYSTEM

FDVL43 Speed Driver

150-screw coil. Stand-up T-handle. Depth control.

CS8200SLP-T17

\$214.00

#8 x 2" 305 SS Type 17 1,800/box

CS8212SLP-T17

\$223.00

#8 x 2-1/2" 305 SS Type 17 1,800/box

HC Clip Series

Hidden blind clip. Board-edge. No face fastening.

WHY 316 SS ON EXOTIC WOOD

Ipe, cumaru, and teak contain natural tannins and acids that streak standard coated screws within one season. 316 SS is inert against these acids: no staining, no corrosion ring around the fastener, even in coastal conditions.

COMPATIBLE SPECIES

Ipe / Cumaru / Teak / Garapa

Any dense tropical hardwood deck

EXOTIC HARDWOOD

STAINLESS COIL + HIDDEN CLIP IPE / CUMARU / TEAK / TROPICAL DECKING

305 and 316 stainless coil screws for exotic hardwood decking. Tannin-resistant, hidden clip compatible. No face fasteners on the deck surface. Coil runs on FDVL43 (150/fill). Type 17 hardened tip for dense tropical species.

- 305 SS: base stainless option, resists most tropical tannin acids
- 316 SS: marine-grade, highest corrosion resistance for coastal and waterfront
- Type 17 tip: no pre-drill into ipe, cumaru, garapa
- HC clip: blind edge fastening, no face screws visible
- Coil on FDVL43 (150/fill), strip available on request

305 SS COIL / FDVL43

CS8200SLP-T17 #8 x 2" 305 SS 1,800/box \$214.00

CS8212SLP-T17 #8 x 2-1/2" 305 SS 1,800/box \$223.00

316 SS / CONTACT FOR QUOTE

316 marine-grade stainless available in equivalent sizes on custom order. Ask rep for current lead time and pricing.

HC HIDDEN CLIP SERIES

Board-edge blind clip. Compatible with ipe and dense tropical decking (15/16" and 1-1/8" thick boards). Ask rep for current SKU and per-clip pricing.

KEY SPECS AT A GLANCE

Material	305 or 316 Stainless
Tip	Type 17 hardened
Drive	#2 Square
Coil tool	FDVL43 (150/fill)
Clip	HC Series (board-edge)
Species	Ipe / Cumaru / Teak / Garapa

305 VS 316 STAINLESS

305 SS handles the acid exposure of most tropical hardwoods in standard residential conditions. 316 SS is the upgrade for waterfront or coastal applications where salt spray is a factor. Both eliminate tannin staining that plagues coated deck screws.

COMPATIBLE TOOLS

FDVL43 (coil, 150/fill)

CH7390 Ultra Driver (strip)
